

Prescription Savings Program

Plan Enhancement

Your health, as well as the health of your loved ones, is important to us. With health care costs on the rise – particularly for prescription medications – we want to help you find the lowest cost for the medications you need, even if you have prescription benefit coverage.

Who it's for

You can now save on medications that aren't covered under your prescription plan with this no-cost benefit enhancement. You or anyone in your family can receive a discount on non-covered medications at more than 65,000 participating pharmacies nationwide. You can even get discounts on medications for your pets.

How it works

All you need to do is present your Aetna® card when you fill your non-covered prescription, and you'll save up to 80%* on generic medications and up to 40%** on brand-name medications.

Visit [banneraetna.com](https://www.banneraetna.com) to check drug costs, choose a participating pharmacy, and start saving on your prescription medications.

Please note: You are responsible for paying the full amount of the discounted price of your medication at the time of purchase.

*Average savings of 55% for generics. **Average savings of 24% for brands and blended savings of 40%. †Prescription savings for pet medications cannot be combined with any other discounts. Heartworm or flea/tick prevention medications are not covered.

This is not insurance. The Plan Enhancement Drug Discount Program is offered by your Plan and operated by CVS Caremark®. Discounts are only available at participating retail pharmacies. This is a limited program only for eligible employees and their dependents. It is not available to anyone outside of these groups.
