

Prescription Savings Program RxSavingsPlus

Your health, as well as the health of your loved ones, is important to us. With health care costs on the rise – particularly for prescription medications – we want to help you find the lowest cost for the medications you need. Even if you don't have prescription benefit coverage

Introducing RxSavingsPlus[®]

Banner is pleased to provide you and your family with access to RxSavingsPlus, a drug discount program that can help you save up to 80%* on generic medications. And up to 40%** on brand-name medications, at more than 65,000 participating pharmacies nationwide.

How it works

You can get a card online by providing your email address. Then, price your prescription medications to see how much you'll save with the RxSavingsPlus card. To start saving, simply print the card or display it on your mobile device. Show it at your local pharmacy. You'll need to pay the full amount of the discounted price of your medication at the time of purchase.

Who it's for

If you're employed part-time and don't have prescription benefit coverage or a new team member waiting for your coverage, you can use the RxSavingsPlus card to get prescription discounts for the whole family – even pets.

*Average savings of 55% for generics. **Average savings of 24% for brands and blended savings of 40%. †Prescription savings for pet medications cannot be combined with any other discounts. Heartworm or flea/tick prevention medications are not covered.

This is not insurance. The RxSavingsPlus Drug Discount Program is offered by your Plan and operated by CVS Caremark®. Discounts are only available at participating retail pharmacies. This is a limited program only for eligible employees and their dependents. It is not available to anyone outside of these groups.
